## Interests

Tech Exploration

Web-Development

Coding

Versatile Full Stack Developer with a strong passion for crafting intuitive and visually engaging websites. Skilled in front-end and back-end development, with hands-on expertise in the MERN stack. Committed to delivering seamless user experiences and driving innovation through creative problem-solving. Continuously upskilling to stay ahead of industry trends and standards. Eager to contribute technical expertise and collaborative energy to dynamic teams in fast-paced environments.

## TRAINING EXPERIENCE

### Web Developement Trainee - AlmaBetter (Bangalore)

10 March 2023 - Present

- Acquired **practical skills** in both **front-end programming** and **back-end programming**, including the utilization of tools like **Node.js** and databases like **MongoDB**.
- Developed and fine-tuned **web applications** by employing **front-end libraries** such as **React** and **back-end frameworks** like **Express**.
- Acquired knowledge of **industry best practices**, including **payment gateway integration** and **data encryption**, to ensure the development and deployment of high-quality, **secure web applications**.

## ACADEMIC PROJECTS

### Red Bus

23 March - 26 April 2024

🔗 Link: <https://red-bus-by-ashvary.netlify.app/>

- Developed a comprehensive **bus reservation platform** enabling users to search, book, and manage tickets with ease.
- Designed a responsive frontend using **ReactJS** and **Tailwind CSS**, with efficient state management via **React-Redux**.
- Engineered a robust backend infrastructure with **Node.js** and **MongoDB**, integrating **Stripe** for secure payment processing.
- Implemented core features such as **seat selection**, **passenger detail management**, and **instant digital ticket generation** post-payment.
- Conducted extensive **input validation** and testing, reducing project time complexity by **30%** and boosting system performance and reliability.

### Flashcard Generator

5 Aug - 27 Oct 2023

🔗 Link: <https://flashcardgenerator4.netlify.app/>

- Developed a **user-friendly platform** for creating, managing, and sharing **text and image-based flashcards**.
- Utilized **ReactJS**, **Tailwind CSS**, **Redux Toolkit**, **Formik**, **jspdf**, **Yup**, and **React Router Dom** to build a responsive and feature-rich frontend.
- Integrated features like **flashcard creation**, **editing**, **sharing**, **downloading**, **deletion**, and **print support** for enhanced usability.
- Applied **Agile methodology**, leveraging **localStorage** for data management, **React-Redux** for state management, and **Formik** for input validation, resulting in a **20% reduction in project time complexity**.

## PERSONAL PROJECT

### E-Com-App

26 Feb - 28 May 2024

🔗 Link: <https://ecom-app-by-ashvary.netlify.app/>

- Developed a **user-friendly e-commerce application** that simplifies browsing, purchasing, and product management.
- Built with HTML, CSS, JavaScript, React, Tailwind CSS, Redux Toolkit, NodeMailer, React Router, Formik, and Yup**, ensuring a dynamic and responsive design, with **Express** handling server-side functionality and **MongoDB** managing efficient data storage and retrieval.
- Implemented **advanced features** such as **product search**, **cart management**, **order placement**, **seamless checkout**, **user authentication with JWT**, and **secure payments via Razorpay**.
- Integrated **forgot/reset password functionality via email**, enabling a smooth user experience with easy account recovery.
- Designed a responsive UI** for optimal performance across devices, allowing customers to manage profiles, track orders, and empowering **admins** to update products, manage orders, and moderate reviews.
