SUMMARY

Full Stack Developer specializing in the MERN stack, with a passion for building intuitive, high-performance web applications. Skilled in both front-end and back-end development, I combine technical expertise with creative problem-solving to deliver seamless user experiences. Committed to continuous learning and innovation, I thrive in collaborative environments and am eager to contribute my skills to dynamic, forward-thinking teams.

TRAINING / EXPERIENCE

Viacerta Abroad

Backend Developer

1 March 2025 - Present

🔗 [Link : https://viacertaabroad.com/](https://viacertaabroad.com/)

- Developed a secure **backend system** with **JWT-based authentication**, **bcrypt password encryption**, **Redis caching**, and **server-sent events (SSE)** for real-time updates.
- Built interactive **chatbots using Socket.io**, automated messaging via **WhatsApp**, and **dynamic email templates** for enhanced user engagement.
- Created **RESTful APIs** for various modules (*blogs, courses, inquiries, student profiles, support tickets*) with secure, multi-format file uploads.
- Implemented **automated lead data generation** (Excel), scheduled tasks with cron jobs, and **secured routes with rate limiting** for high availability.

SellerPundit

Internship - Software Developer

11 Sep 2024 - 15 Oct 2024

- Refactored MVC folder structure** for improved scalability, maintainability, and code efficiency.
- Integrated Nodemailer** for flexible, purpose-specific email automation.
- Built utilities for seamless **Excel data imports and exports**.
- Fixed bugs, removed duplicate code, and streamlined logic for better performance.

PROJECTS

Red Bus

23 March - 26 April 2024

🔗 [Link: https://red-bus-by-ashvary.netlify.app/](https://red-bus-by-ashvary.netlify.app/)

- Developed a comprehensive **bus reservation platform** enabling users to search, book, and manage tickets with ease.
- Designed a responsive frontend using **ReactJS** and **Tailwind CSS**, with efficient state management via **React-Redux**.
- Engineered a robust backend infrastructure with **Node.js** and **MongoDB**, integrating **Stripe** for secure payment processing.
- Implemented core features such as **seat selection**, **passenger detail management**, and **instant digital ticket generation** post-payment.
- Conducted extensive **input validation** and testing, reducing project time complexity by **30%** and boosting system performance and reliability.

E-Com-App

26 Feb - 28 May 2024

🔗 [Link: https://ecom-app-by-ashvary.netlify.app/](https://ecom-app-by-ashvary.netlify.app/)

- Developed a **user-friendly e-commerce application** that simplifies browsing, purchasing, and product management.
- Built with HTML, CSS, JavaScript, React, Tailwind CSS, Redux Toolkit, NodeMailer, React Router, Formik, and Yup**, ensuring a dynamic and responsive design, with **Express** handling server-side functionality and **MongoDB** managing efficient data storage and retrieval.
- Implemented advanced features** such as **product search**, **cart management**, **order placement**, **seamless checkout**, **user authentication with JWT**, and **secure payments via Razorpay**.
- Integrated forgot/reset password functionality via email**, enabling a smooth user experience with easy account recovery.
- Designed a responsive UI** for optimal performance across devices, allowing customers to manage profiles, track orders, and empowering **admins** to update products, manage orders, and moderate reviews.
